

Multiplicas CellAttach tratadas para cultivo celular 96 pocillos fondo U pack 100

Código: 00005844
Fecha: 09/04/2025

We supply premium cell culture plates with a range of specifications and surfaces for experimental research, optimization, and analysis to deliver the best outcomes for cell culture and subsequent cell assays, such as cell transfection, immunofluorescence, and clone formation. These plates assist with experimental research, optimization, and analysis. Surface-untreated plates are suitable for suspension cell cultures, while those with the TC-treated surface are optimal for common adherent cell lines due to the excellent hydrophilicity of the polystyrene surface. The CellATTACH® superhydrophilic treated surface represents a technical advancement that allows better adhesion and proliferation of fastidious cells, as well as primary or transfected cell lines under low serum/serum-free conditions. Specifications Single-well 4-well 6-well 12-well 24-well 48-well 96-well 384-well Bottom Type Flat U-shaped Surface Types Non-treated TC-treated CellATTACH® treated Packaging Blister Pack
