Buy 2, get 1 free with AssayGenie

ColorStep ELISA Kits

Fast 90–120 minute ELISA with colour-coded reagents

Offer valid from 01/10/2026 to 31/12/2026

90–120 min
total protocol time

1–2 washes
instead of 4 in a traditional ELISA

Colour-coded
reagents: fewer pipetting errors

50 µL
of sample, ideal for precious samples

CV <6%
precise, reproducible results

1,700+ kits
across 12 species

How it works

1. Buy 2 ColorStep ELISA kits from the promotion and get the 3rd free.
2. Mix and match any references you like.
3. The free kit must be of equal or lower value than the cheaper of the two kits purchased.
4. Place your order through your Proquinorte team and we'll apply the offer.

Want to make the most of the offer, can't find your target, or need a price and lead time?

Email us or talk to your sales rep and we'll help you choose.

ColorStep: fast ELISA with colourful reagents

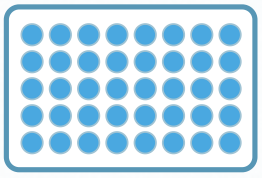

ColorStep ELISA kits are designed for scientists who need results fast. With total protocol times of just 90–120 minutes, only 1–2 wash steps and colour-coded reagents, they simplify your workflow without compromising performance.

They come pre-coated and ready to use, so there is no prep time and less risk of pipetting errors. They need just 50 µL of sample, deliver a CV <6% with robust recovery, and there are over 1,700 kits across multiple species.

90–120 minute protocols with colour-coded steps

	Traditional ELISA	ColorStep 90 min	ColorStep 120 min	ColorStep advantage
Assay duration	~4 hours	90 minutes	120 minutes	Much shorter assay time
Wash steps	4	1	2	Fewer washes, faster and easier handling
Detection reagent prep	Requires dilution	Ready to use	Ready to use	No dilution: fewer handling errors
Reagent colour	Not coloured	Colour-coded	Colour-coded	Visual cues prevent pipetting mistakes
Precision (CV%)	<8%	<6%	<6%	Higher precision and consistency
Number of reagents	9	6	7	Fewer reagents to handle

ColorStep 120-minute protocol

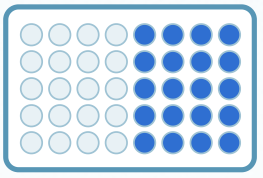

Step 1 · 60 min
Antibody added, followed by standard or sample

Colour: Blue

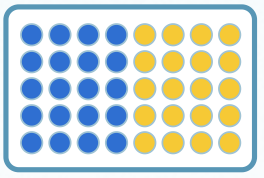

Step 2 · 30 min
HRP-streptavidin added to the wells

Colour: Orange

Step 3 · 10–20 min
TMB substrate added to the wells

Colour: Colourless to blue

Step 4
Stop solution added and plate read

Colour: Blue to yellow

Kits included in the promotion by species

903 Human	**395** Rat	**272** Mouse	**71** Monkey (NHP)	**50** Rabbit	**15** Porcine	**7** Guinea pig
2 Bovine	**2** Canine	**2** Hamster	**2** General	**2** Goat	**2** Sheep	**1** Bacterial
