The future of the planet and your laboratory

epT.I.P.S.® BioBased Bulk

Aware of the growing importance of sustainability in purchasing decisions, Eppendorf offers epT.I.P.S.® **BioBased pipette** tips in volumes up to 1,250 µL Long. Made from 100% bio-based polypropylene, sourced from renewable and reused resources, these tips significantly reduce your laboratory's carbon footprint, with 54% less plastic in the refill system. These products are available in various Eppendorf qualities, such as **Dualfilter®** and **SealMax®**.

Multipette E3 / E3x: precise repetitive pipetting

The Multipette E3 and E3x electronic pipettes are designed to simplify repetitive pipetting and improve accuracy in routine and advanced laboratory applications. Both models include a charging adapter, charging stand, and a pack of Combitips® advanced. They operate on universal power supply compatible with standard electrical networks.

Innova 40 / 40R*

Bench-top incubator shaker

Power supply: 230V, 50Hz

Need to optimize your workspace without sacrificing capacity? The Innova 40/40R is a benchtop shaker designed to handle flasks up to 3 L, offering ergonomic access and full visibility. Thanks to its legendary triple eccentric motor, this equipment guarantees uninterrupted performance and exceptional durability, even on the most demanding days.

Centrifuges*

Designed to go beyond standard features such as speed and capacity, with optimized ergonomic handling and temperature management. Depending on the model, they offer very quiet operation, a soft-touch lid closure, and intuitive operation via haptic controls or touchscreens. Intuitive controls and clear displays ensure that operating the centrifuge is as easy as possible.

Mastercycler for PCR*

Designed to offer maximum reproducibility, advanced optimization, and flexibility in PCR applications. Thanks to their excellent temperature control, advanced features such as 2D gradient and adaptable user management, they deliver reliable results. Their modular design allows up to 10 units to be connected, facilitating work in high-throughput or multi-user laboratories. They include universal power supply (110-230 V) and connectors compatible with European and international systems.
